

## Business Problem Statement:

Project : CURA Health Care Services

The CURA Health Care Services project aims to address the critical challenge of optimizing patient experience by minimizing waiting times and enhancing access to accurate, up-to-date information about doctor availability. The current healthcare system faces inefficiencies in managing patient flow, leading to prolonged waiting periods and potential dissatisfaction among patients. Additionally, the lack of real-time information on doctor availability contributes to an environment of uncertainty and frustration for both patients and healthcare providers.

The identified business problem is the need for a comprehensive solution that ensures the seamless and timely delivery of healthcare services. This involves streamlining patient appointments, minimizing wait times, and providing transparent. By doing so, CURA Health Care Services aims to improve overall patient satisfaction, optimize resource utilization, and foster a more efficient and patient-centric healthcare experience.
